Solutions

FOREFRONT NSW LOCAL GOVERNMENT TECHNOLOGY SUMMIT • 26 MAY 2026

Where to start when AI demands a foundation you don't yet have.

*Why most council AI pilots stall
— and a reference path the few who reach
production are taking.*

Inside, three stages.

One reference path.

From a Victorian council that's already done it. Read on →

TODAY — WHAT IT TAKES TO LAND PRODUCTION AI

Three stages. One foundation underneath them all.

01 UNIFY	02 CURATE	03 EMPOWER
Every source in one layer. <i>Without migrating off any of them.</i>	Make data mean something. <i>Once. Then everywhere.</i>	AI on a foundation you trust. <i>Traceable answers, not hallucinations.</i>

GOVERNANCE *The substrate beneath all three. Not a fourth stage. Not bolted on at the end.*

AND IT'S NOT THEORETICAL

A Victorian council has already done it.

Detail used with permission of Whitehorse City Council and CIO Victoria Stocks.

4	8	PRODUCTION
GOVERNANCE DOMAINS with named owners and stewards	DATA PRODUCTS glossary terms, ownership, quality rules	TODAY running on Microsoft Fabric

TOMORROW — THREE DOORS. NINETY DAYS.

DAYS 1-30	DAYS 31-60	DAYS 61-90
FOUNDATION Pick one painful dataset. Unify it. Apply governance.	FIRST INSIGHT Build one report or model that couldn't exist before. <i>Concrete. Low-risk. Measurable. Inside one budget cycle.</i>	FIRST AI Build one AI agent grounded on your governed data.
